

# Hessle High School & Sixth Form College

## Welcome to our Open Evening

## Business & ICT

### The Course

In Year 7 students will learn how to create Business Documents, how a Computer Network works and how to write Computer programs. While in Year 8 they will write more complicated Computer programs, use Micro-bits and learn how to use more subject specific software.

During Key Stage 3 students will cover a wide range of exciting topics:

- Computer Programming
- Desktop Publishing
- Spreadsheet Modelling
- creating animation
- Cyber Bullying
- Internet Safety
- Data Handling
- preparation for Business
- ICT for Business and Society

### Assessment

Assessments take place every half term. We use a range of practical testing methods which enables students to showcase all the skills they have learnt in ICT.

### How Parents Can Help

- help with research activities
- encourage your child to talk about ideas and topics of work being done in ICT lessons
- talk about your own experiences to compare and contrast with your child's experience
- encourage your child to complete a wide array of ICT specific Homework Tasks whether that be on Doodle or Google Classroom
