Rear Double	1854 x 1371 mm 6'1" x 4'6"	1840 x 1840mm (6'0" x 6'0")
Rear Twin Beds	-	1840 x 660mm (6'0" x 2'2") 1790 x 675mm (5'10" x 2'6")

Please note:

- Data & accuracy: The contents of this publication are as accurate as possible at the time of going to press (Oct 2019), but this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Details of performance, dimensions and weights are subject to minor deviations within manufacturer tolerance limits (max +/- 5%).
- Vehicle drawings are not to scale. All dimensions are in millimetres (mm), unless otherwise stated.
- The height measurements listed may vary by ± 50mm depending on model and equipment fitted.
- All masses and weights are subject to a tolerance of +/-5% complying with the European Directive 1230/2012.
- *MTPLM weight includes approximately 90% fuel load and 75kg for driver.
- Maximum User Payload = MTPLM minus mass in running order. Quoted weights are for vehicles with standard specification. MTPLM and mass in running order may be influenced by factory options and Van Centre fitted accessories.
- **Please consult your sales representative for more detailed towing information.
- ¹Fuel consumption and CO₂ figures are obtained under standardised EU test conditions. This allows a direct comparison between different manufacturer models but may not represent the actual fuel consumption achieved in 'real world' driving conditions. In addition to the fuel efficiency of a vehicle, driving behaviour as well as other non-technical factors (such as environmental conditions, including weather and traffic) play a role in determining a vehicle's fuel consumption and CO₂ emissions. More information is available at www.dft.gov.uk/vca. Other factors including trimline, extra equipment, options and accessories (wheels, tyres, etc.) may change vehicle parameters such as the weight, rolling resistance of the tyres and the aerodynamics and thus influence the fuel consumption, CO₂ emissions and driving performance values.
