HOW MUCH COULD YOU SAVE?

A) Caravans insured for under £25,000 and motorhomes under £45,000.

Generally insurance companies do not require a tracking device to be fitted to your vehicle, but having one can reduce your insurance costs and allow you to recoup

some or all of the cost of subscribing to the Swift Command Tracker.

Below are example Supersure INSURANCE costs for new Swift caravans. If you're an experienced, claim-free caravan owner your premium could be even lower.

Model sum insured (includes £1,500 of equipment)	Standard Supersure INSURANCE cost	Insurance cost with Swift Command Tracker	Insurance saving	Swift Command Tracker subscription	Subscription vs insurance saving
£17,480	£357	£273	£84	£95	Cost £11
£21,155	£470	£359	£111	£95	Save £16
£24,725	£535	£409	£126	£95	Save £41

B) Motorhomes insured for over £45,000 and under £60,000

Some insurers require you to fit a Thatcham Category 1 approved alarm, which costs £300.00 or more** to purchase and fit. In comparison, the annual subscription for the superior Thatcham approved category 6 Swift Command Tracker is £95.00, meaning you could save over £200 in Year 1

C) Caravans insured for £25,000 or more, and motorhomes over £60,000.

Several insurers require you to fit an approved tracking device before they can offer cover, which costs £199.00* or more to buy and install, along with a subscription of £149.00*. As Swift Command Tracker is pre-installed, there is no cost except for the annual £95 subscription, meaning you could save over £240 in Year 1

Insurance discounts are correct at time of publication (October 2018). Caravan premiums are based on having a hitchlock and wheelclamp fitted, kept on home driveway at HX4 0BE, owners 35 years old, introductory no claims bonus for towing experience, £100 excess, default cover options selected and includes 12.5% online discount. Premiums include 12% Insurance Premium Tax and are correct as of 09/10/2018. Swift Command Tracker is awarded 15% off touring caravan insurance and 25% off motorhome insurance. Minimum premiums apply. Details in this brochure are correct at the time of print but may be subject to change. We reserve the right to withdraw offers at any time. Supersure INSURANCE is arranged and administered by Caravan Guard Limited. Caravan Guard Limited is authorised and regulated by the Financial Conduct Authority (No. 310409), registered in England Number 4036555 at New Road, Halifax, West Yorkshire, HX1 2JZ.

*based on recommended retail price of buying and fitting similar Category 6 tracker devices as listed on Trackerfit website October 1, 2018, excludes subscription cost.

**based on the advertised fitted cost of the Sigma S34 Thatcham approved alarm system at www.sasmobile.co.uk, October 1, 2018.

Terms and conditions apply

HOW DOES THE SWIFT COMMAND TRACKER WORK?

The Swift Command Tracker has a motion detector that identifies illegal movement and sends an alert to the 24/7 monitoring centre, who will then contact you directly. Once you've confirmed the theft, the monitoring centre will track your vehicle and work with the police until it is recovered.

PEACE OF MIND

Thatcham approval is considered an international benchmark for crime prevention security products. All approved products follow a rigorous testing regime to ensure they are fit for purpose.

CATEGORY 6

Category 6 is the second highest category of tracker available, recognised and approved by insurance specialists such as 'Supersure INSURANCE'. As such you can benefit from significant discounts on your insurance premiums, depending on your insurance provider.

PROACTIVE ASSURANCE

Swift Command Tracker is proactive, meaning the monitoring centre is alerted if your vehicle moves and can then notify you. By being proactive it can lead to a quick recovery giving thieves little time to damage or steal items inside. There is also no need for you to regularly monitor your vehicle location.

CAN I JUST USE SWIFT COMMAND LOCATOR INSTEAD?

Swift Command does come with a useful locator function, but this is not a security device and is not approved by insurance companies as it is a self-monitored system.

The Locator updates your vehicle location every 6 hours, so if your vehicle is stolen it could be several hours before you see the vehicle has moved. The system is also reactive, meaning you need to access Swift Command and check your vehicle location. If you discover your vehicle has been stolen, you would have to notify the police and work with them to recover the vehicle.

COULD A TRACKING DEVICE BE A CONDITION OF INSURANCE COVER?

An insurer may require you to fit an approved tracking device before they can offer cover. With Caravan Guard, this applies to single axle caravans insured for £30,000 or more, twin axle caravans for £25,000 or more, and motorhomes over £60,000.

Motorhomes insured with Caravan Guard for over £45,000 also require a Thatcham Category 1 approved alarm. This requirement can be overridden by having a Thatcham Category 6 approved tracking device.

Approved tracking devices or Category 1 alarms can cost in excess of £300** and an annual subscription is usually required to keep a tracker activated. As Swift Command Tracker is pre-installed, you only have to pay the annual subscription.
